Tejas Maintenance
St. Croix, Virgin Islands

Recent Certifications and Qualifications

- Designated Safety Level 1 qualified at Exxon Baytown, TX.
- PICS (Pacific Industrial Contractor Screening)
- TWIC (Transportation Worker Identification Credential)

Saw Dimensions

- 26"
- 36"
- 48"
- 60"
- 76"
- 96"
- Also available asymmetrical saw capable of cutting any size, shape, structure, whatever limits to access.

Experience

Worlds leading metal wire sawing contractor in the offshore, nuclear, and process industries. We offer precision predictable segmentation solutions for decommissioning and pipeline infrastructure and maintenance support.

Solutions

Our design, engineering, and fabricating of customized deployment fixtures married to our sawing technology allows us to offer our customer project specific solutions whether the need is multiple repetitive cuts or unique segmentation challenges in hostile environments.

Performance

Simplicity of design, reliability, and proprietary wire have resulted in unprecedented cutting rates making Bluegrass the world leader. Typical pipe cut durations have ranged from 16" legs cut in 15 minutes, 24" well heads cut in less than hour, and 33" legs cut in 1 hour and 15 minutes. All cuts were completed at depths ranging from 80' to 230'. Each cut completed with a single wire.
