

BLUEGRASS

CONCRETE CUTTING : ROBOTIC HAMMERING : DEMOLITION CONTRACTOR

POWER PROBLEMS?

Engineered solutions, turnkey performance solving your maintenance, outage, or decommissioning challenges.

As companies invest and upgrade in new equipment technologies, the need for time, vibration and emission sensitive renovation techniques, are top priorities for reducing the impact of maintenance or outage work on station operations. Performing in Fossil, Nuclear, and Hydro stations we modify or remove structures as specified, whether concrete or metal.

CONCRETE CUTTING

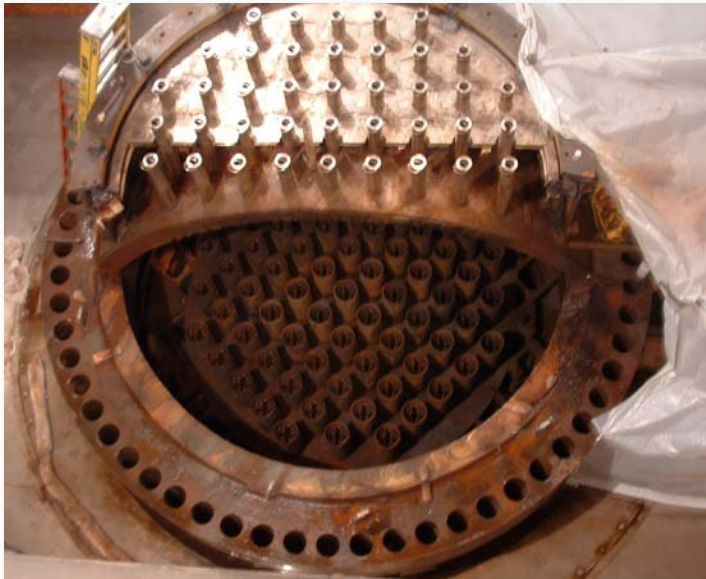

Turbine pedestals, compressor, pump, coal handling, bioshield, draft tube, fish bypass, and many other concrete structures.

Turbine Retrofit Queens, NY

Stack Removal Humboldt, CA

Segmented Reactor Head Rancho Seco Sacramento, CA

METAL CUTTING

Inconel, steel, stainless, tube bundles, reactor nozzles, reactor heads, heavy process piping, and draft tube liners.

Reactor Nozzle Cut San Onofre, CA

PEOPLE AND EQUIPMENT

Building on the experience of more than 150 successfully completed Power Projects, 35 wire saws, and 25 robots, our people are ready to join your team.
